Tiago Pala Baraúna

Software Engineer Specialist | Backend Specialist | .NET Developer |
3x AWS Certified @ Zup Innovation
Santo André, São Paulo, Brazil

Summary

Software engineer specialist with extensive experience in developing cloud applications for the financial market, particularly in the BaaS - Banking as a Service sector.

Among some of the financial products I have had the opportunity to contribute to, the most prominent ones include: overdraft, chargeback, automatic yield, PIX (instant payment system), boletos (payment slips), iti digital account, and Player's Bank.

In these projects, I have been involved in all stages of building a digital product, working alongside business stakeholders and leading the engineering team in requirements analysis, solution design, architectural design, technical refinement, implementation, and product support.

Among the key qualities for the success of the mentioned products, I can highlight the use of cloud-first and cloud computing concepts, utilizing the main services of AWS, and my expertise in developing .NET applications.

Currently, I am assigned to Itaú Unibanco, working on building a highly scalable and composable platform for the integration of any strategic partner seeking to add native banking features to their own journeys.

Experience

Zup Innovation

3 years

Software Engineer Specialist

January 2023 - Present (1 year 5 months)

Santo André, São Paulo, Brasil

Senior Back-end .NET Core Developer

June 2021 - December 2022 (1 year 7 months)

Santo André, São Paulo, Brasil

Involvement in the financial area, specifically in the Banking as a Service (BaaS) sector assigned at Itaú Unibanco.

My first assignment was in the Money team, which was responsible for maintaining applications for financial control of our customers and partners. I also participated in the development of new functionalities for the iti (Itaú's digital account) and Player's Bank. Some of the features I worked on are: PIX, automatic income, and bills.

Currently, I am on the Onboarding team, responsible for creating a highly scalable and composable platform for integration with any strategic partner seeking to add native banking features in their own journeys.

act digital

Fullstack Developer

October 2020 - May 2021 (8 months)

Santo André, São Paulo, Brasil

Involvement in the financial area, assigned at Banco BTG Pactual, responsible for maintaining applications for the management of customers' overdrafts and mainly in building the bank's first chargeback product for cards through the implementation of a serverless architecture using the main services of AWS.

Scania Group

1 year 8 months

Fullstack Developer

December 2019 - September 2020 (10 months)

São Bernardo do Campo, São Paulo, Brasil

Involvement in the tax area, with a focus on migrating legacy applications in Oracle Forms/Reports to a cloud environment using "cloud first" concepts, as well as implementation of new tax features integrating with the SEFAZ (state tax office).

Software Engineer Intern

February 2019 - November 2019 (10 months)

São Bernardo do Campo, São Paulo, Brasil

Involvement in an internal team whose responsibility was to maintain the company's access control and asset control applications. Involved in creating and maintaining small modules in .NET and studying the platform.
